Ahmedabad, Gujarat, India

Summary

"I am an AI/ML enthusiast with a passion for solving complex challenges through data-driven solutions. I enjoy applying machine learning techniques and deep learning models to derive insights and develop innovative solutions. With a strong foundation in data science, I am continuously expanding my knowledge and skills, aiming to grow as a data scientist or machine learning engineer.

Currently, I am pursuing my studies in Artificial Intelligence at Gujarat University, where I continue to refine my expertise in AI and machine learning.

Feel free to connect if you're interested in AI, machine learning, or exploring new opportunities in this space!"

Experience

Advant AI Labs
Trainee AI/ML Engineer
August 2025 - Present (3 months)

Petpooja
Data Science Intern
October 2024 - August 2025 (11 months)
Ahmedabad, Gujarat, India

Bharat Intern
Machine Learning Engineer
March 2024 - April 2024 (2 months)

During my machine learning internship at Bharat Intern, I gained hands-on experience working on various real-world projects. I developed models for house price prediction, where I used regression techniques to estimate property values based on key features. I also worked on iris classification, implementing classification algorithms to distinguish between different

species of the iris flower. Additionally, I built a movie recommendation system, leveraging collaborative filtering techniques to suggest personalized movie choices. These projects enhanced my understanding of machine learning concepts, data preprocessing, and model evaluation.

Education

Gujarat University

Bachelor's degree AIML, AIML · (November 2021 - November 2024)

Shiv Ashish School

· (June 2019 - June 2021)

Global Mission Internation School

· (July 2015 - July 2019)
